DEAR COLLEAGUES!

We are pleased to invite you to take part at the 1st Russian nationwide conference with international participation «Cryosurgery and New Medical Technologies».

During the conference are planned breakout sessions on modern approaches of the high-tech methods' treatment of a variety of surgical diseases. Lectures will be presented by leading experts in the field of cryosurgery, surgical hepatology, pancreatology and gastroenterology, anaesthesiology and intensive care. Debates are scheduled as part of the breakout sessions.

The purpose of the conference is the exchange of experience on high technology between physicians of different specialties from various regions of Russia, as well as several foreign countries.

The conference venue choice is not accidental, in particular it was St. Petersburg where in 2008 the International Institute of Cryomedicine was organized, in 2009 the 15th World Congress of the International Society of Cryosurgery was held. The Conference Steering Committee is confident that this conference will be of interest to a wide range of professionals and students of higher medical institutions.
